

# Practical Behavioural Data Collection

---

Why, what, and how?

**Dr. Russ Fox**

Monash University

**24 May 2023**

Think Forward Educators

# Overview

---

- 01** To describe key practices that support effective, consistent, and practical behavioural data collection
- 02** To present a functional approach to understanding behaviour
- 03** To demonstrate how this functional approach can inform practical collection of *usable* behavioural data for major and minor behaviour

# Data

---

Information that can be used to inform decision-making and help support an assessment of impact

# Why?

---

“All individuals who assume responsibility for educating students... must establish a metric that gives them and others the capacity to assess the impact of what they do. "Doing good" is dangerous if individuals do not hold themselves accountable for the outcomes of their propositions, pleas, and promises.”

(Sugai, 1998, p. 174)

# Is it just me?

---

It's me, hi.

»

# **Identifying and defining challenges**

---

## **Step 1. Am I wondering about a major or minor behaviour?**

Minor behaviour:

Behaviour that can and should be managed within the classroom using evidence-based practices

For example:

Calling out – Re-teach

Out of seat – Error correction

Non-example: punching of other students

# **Identifying and defining challenges**

---

**Major behaviour:**

Behaviour that results in significant or persistent disruption, presents safety risks, or is illegal

**For example:**

Possession of illicit substances

Hitting a teacher

**Non-example:** Calling out

## **Step 2: Measure what matters to understand the problem**

Consider the relevant dimension of behaviour

- Frequency: How often a behaviour occurs within a given time period
- Latency: The time that passes between a cue and a behaviour
- Duration: How long a particular behaviour lasts

**What you are interested should shape what you measure...**

»

# **Is there a relevant minor behaviour in your context?**

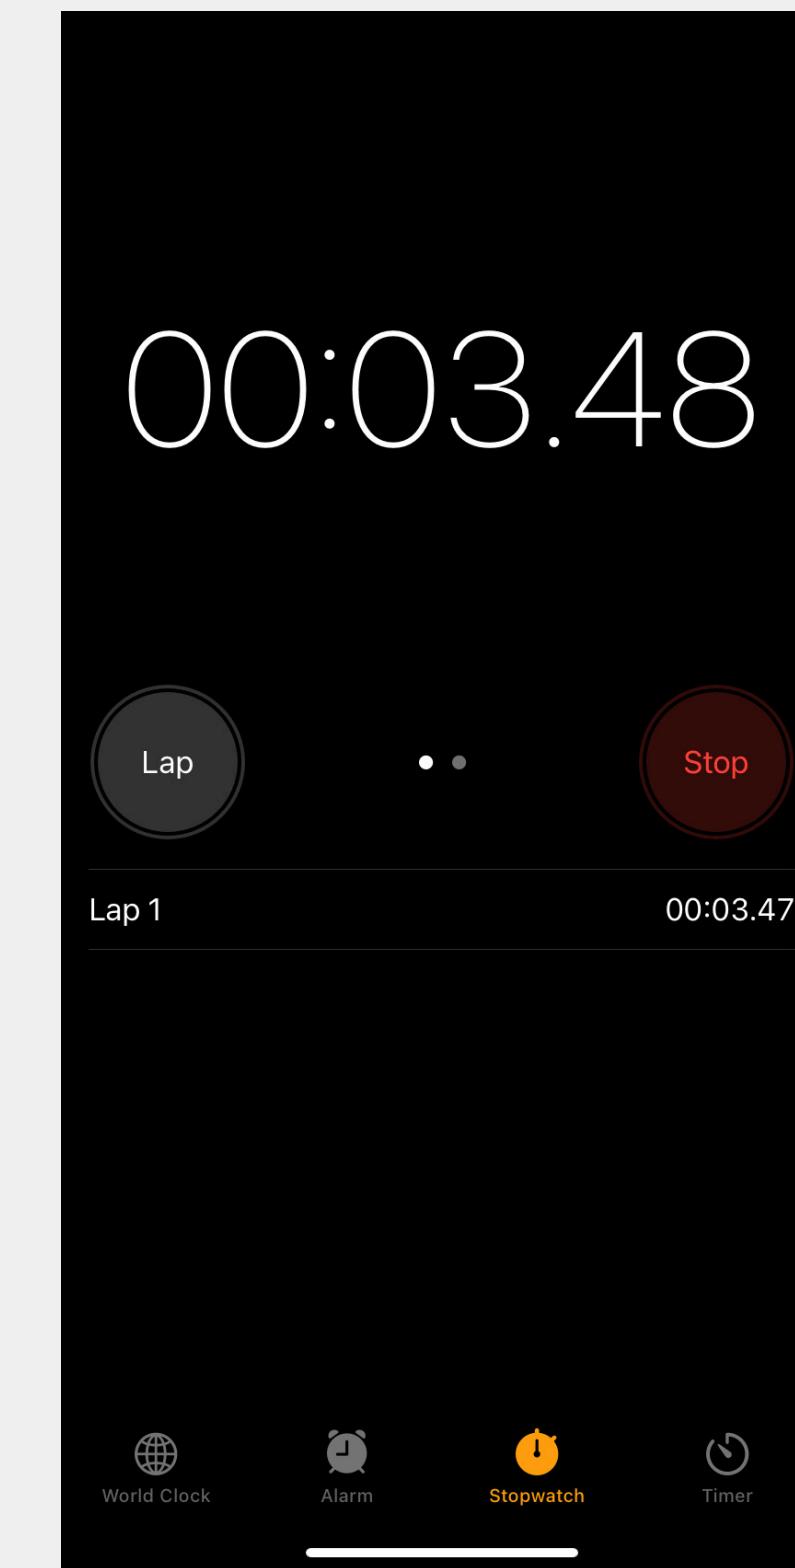

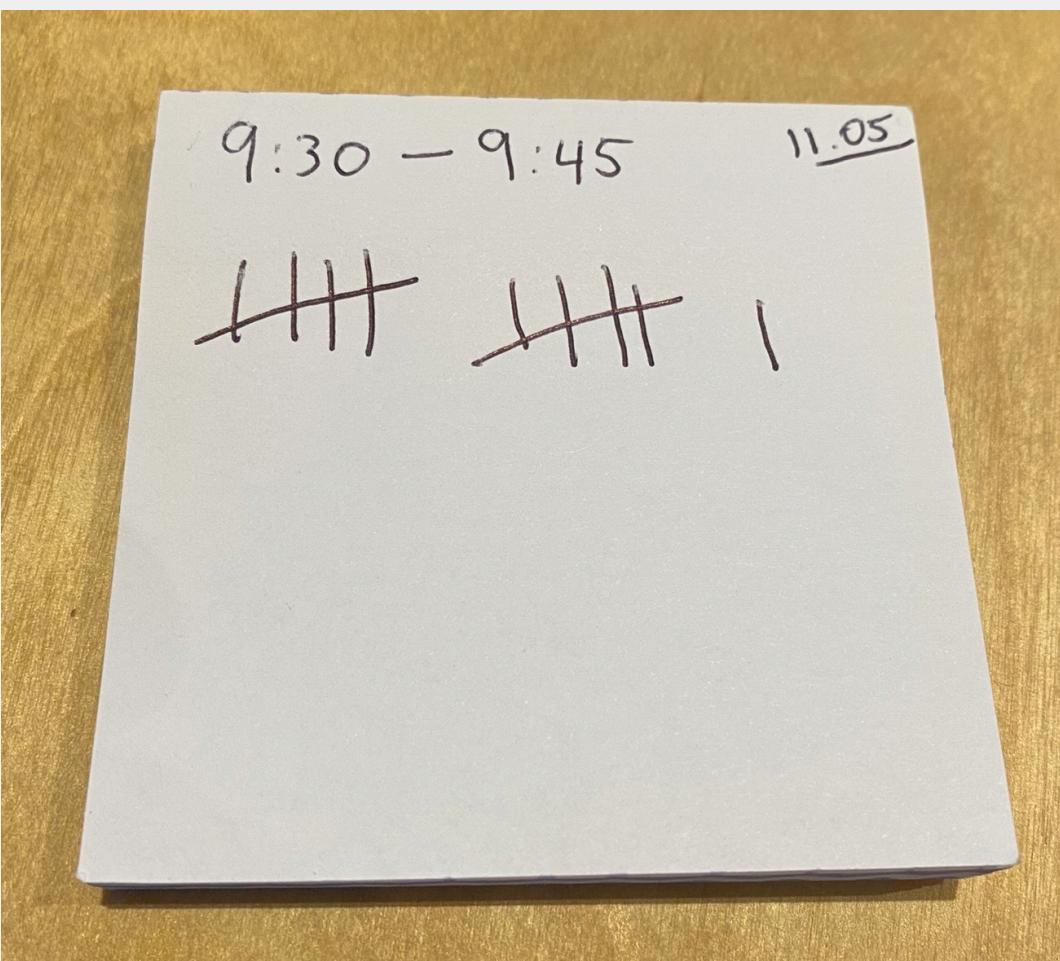

Are you wanting to see a behaviour last longer?

Are you wanting to see less of a behaviour?

Are you wanting to see a behaviour occur more quickly?

# Top Tips

- Be clear in your definition of the target
- Collect comparable data - consistent time, subject, lesson phase
- It is not easy to do when teaching
- Get help!
- Build into existing professional structures
- Check with students
- Simple numbers in a spreadsheet (**date + data = graph**)
- **Trend is your friend!**

# **And then we teach**

---

- Deliver explicit academic and behavioural instruction
- Provide 3-step error correction
- Prompt and pre-correct
- Break tasks down into smallest teachable components (Task analysis)
- Check for understanding
- Use high rates of opportunities to respond
- Use high rates of behaviour specific acknowledgement/praise
- Move around the room
- Smile, be kind

»

## Worked Example 1

Create Chronicle Entry For Student

?

Details	Communications	Notification Chain
<b>Template:</b> * 1. Minor Behaviour (Level 1 - Staff Managed)	<b>Rating:</b> * Amber	
<b>Staff Visibility:</b> Level 1: Admin/Power/Users		
<b>Parent/Student Visibility:</b> Hidden		
<b>Date Occurred:</b> 03/05/2022 7:45 PM		
<b>Minor Behaviour:</b> * Please select the minor behavior that the student demonstrated.		
<b>Location - SWPBS:</b> * Please select the location that the student displayed the behaviour.		
<b>Minor Logical Consequence:</b> * Please select the logical consequence that you issued. If no consequence is required, please select that option.		
<b>Additional Details:</b> Please type a brief professional description of the behaviour.

## Worked Example 2

### Minor Incident: Physical Contact

**Save** **Cancel**

This information is shared between all students involved in this incident.

Date: 24/05/2023

Confidential:  Mark this incident as confidential

Period: \* Monday

Teacher: \*

Location: \* Classroom (Writing)

Subject: \* Block 3

Time:  Record the time of the incident.

\* Fields marked with an asterisk are required.

#### Record Details — All Students

Share for all students

Type of Physical Contact:

Description of Incident - this should include relevant details from each student involved - OPTIONAL FOR MINOR INCIDENTS

#### Follow Up Actions — All Students

Share for all students

Phase 1 strategies:

Phase 2 Strategies

Restorative Chat

Parent Contact (please add detail to comments below)

Comment on Follow Up - this should include details of contact with parents, outcomes of restorative chats and details of logical/natural consequences - OPTIONAL FOR MINOR INCIDENTS

## Worked Example 2

Phase Two strategies attempted:

Redirect   Reteach   Provide choice   Differentiate

Leadership Support Provided by:

Description of Incident - this should include relevant details from each student involved - OPTIONAL FOR MINOR INCIDENTS

### Follow Up Actions — All Students

Share for all students

Tier One Strategies to be Reinforced

Setting   Routine   Supervision   Visual Timetable   Check Understanding   Opportunity to Respond   Explicit Teaching of Expectation   Class Culture   Prompts and Precorrections   Relationships   Acknowledgement   Differentiation  
Learning Intentions/Success Criteria

Tier Two Strategies to be Considered:

Social Skills   Bullying Response   Counselling   Other (specify)

Tier Three Strategies to be Considered:

BSP

Restorative Chat

Completed

Booster Training Required

Booster Activity Completed   Booster Training to be included as follow up activity

Walk & Talk

Withdrawal

From yard   From class   From activity

Parent Contact (please add detail to comments below)

In person   Phone   sms/email   Letter

Suspension

Outside Agency Involvement

Comment on Follow Up - this should include details of contact with parents, outcomes of restorative chats and details of logical/natural consequences - OPTIONAL FOR MINOR INCIDENTS

# Resources to Support Practice Development

## Tier-1 Classroom Support Practices – Data Sheet

Teacher: \_\_\_\_\_ Coach: \_\_\_\_\_ Date: \_\_\_\_\_

Lesson: \_\_\_\_\_ Time: \_\_\_\_\_ Observer: \_\_\_\_\_

**Scoring system:**

N/A: An N/A is scored if a specific practice or teacher behaviour is not relevant or required for the session observed.

0 = Not implemented: A score of 0 is provided if a specific practice or behaviour is relevant and required and no part of the described practice is observed.

1: Partially implemented: A score of 1 is provided if some, but not all elements of the practice or behaviour are demonstrated or observed. Comments should be provided to indicate components of the skill or practice not demonstrated.

2: Implemented with fidelity: A score of two is provided if all elements of the practice or behaviour are demonstrated or observed.

Classroom Environment				
Layout of learning space allows for movement, access to resources, and has clearly defined areas for work	2	1	0	N/A
There is an observable seating arrangement and plan (e.g., rows or pairs with learning partnerships organised)	2	1	0	N/A

# **Practical measurement if the challenges continue**

- 02** To present a functional approach to understanding behaviour
- 03** To demonstrate how this functional approach can inform practical collection of *usable* behavioural data for major and minor behaviour

»

# **Why the theory...**

---

**Function focuses our data collection**

made with mematic

# Thinking functionally

---

Looking to the “circumstances” to explain behaviour,  
not attributing problem behaviour to the individual

Our job is to fix the  
problem, not to fix  
the blame

# **Thinking functionally is not...**

---

Asking teachers to assess what a student is thinking or feeling whilst they engage in disruptive or challenging behaviour

**We care about feelings!!**

»

# The components of functional thinking

When/where/what

Behaviour (s)

What do I get or get away from?

## Context

# Top Tips

- Be clear in your definition of the target
- Be objective
- Thoughts and feelings are important, but we don't assume
- Get help!
- Build into existing professional structures
- Ask students when things are calm
- Check data for disparities...

# **It still comes back to teaching...**

---

- Deliver explicit academic and behavioural instruction
- Provide 3-step error correction
- Prompt and pre-correct
- Break tasks down into smallest teachable components (Task analysis)
- Check for understanding
- Use high rates of opportunities to respond
- Use high rates of behaviour specific acknowledgement/praise
- Move around the room
- Smile, be kind
